

Gray Davis, Governor

STATE CLEARINGHOUSE

NEWSLETTER

November 16 through 30, 2001

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **November 16 through 30, 2001.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html#clearinghouse

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte Joung and Karen Fowler (for projects in Northern California)
Scott Morgan and Brian Grattidge (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Shut down nonessential escalators, elevators and turn off decorative water fountains.

CEQA & Planning Case Law

Summary of Recent CEQA & Planning Case Law

The following are summaries of recent court cases relating to the California Environmental Quality Act and/or land use planning law.

No cases have been selected for the period of November 16-30, 2001.

Please be advised, the information contained in these summaries does not constitute legal advice, nor should the summaries be relied upon as a matter of law. Refer to the full text of the cases cited for the complete ruling and case facts.

Federal Notices

Intergovernmental Review Notices (November 16th – 30th, 2001)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

Agency:	United States Department of Agriculture
Contact:	John D. Berry
Telephone:	(530) 333-4312
E-mail:	N/A
Address:	100 Forni Road, Placerville, CA 95667
Description:	Sierra Pacific Industries, a California corporation, and the United States, by and through the Forest Service, U.S. Department of Agriculture, have signed an Agreement to Initiate for an exchange, under the authority of the General Exchange Act of March 20, 1922 (42 Stat. 465), as amended, involving federal lands.
Comment By:	N/A

Agency:	Federal Energy Regulatory Commission
Contact:	N/A
Telephone:	N/A
E-mail:	N/A
Address:	888 First Street, NE, Washington, DC 20426
Description:	On November 9, 2001, the Commission issued an order granting rehearing in part, denying rehearing in part, and lifting stay for Public Utility District No. 2 of Grant County, Washington (Project Nos. 2114-096 and 2114-097).
Comment By:	N/A

Agency:	Federal Energy Regulatory Commission
Contact:	N/A
Telephone:	N/A
E-mail:	N/A
Address:	888 First Street, NE, Washington, DC 20426
Description:	On November 8, 2001, the Commission issued an order issuing a preliminary permit to study the Wise Powerhouse Outlet Power Project No. 12073-000. The project is located in Placer County, California and would have an annual generation of 2.2 gigawatthours that would be sold to Pacific Gas & Electric Company or a power

distributor.

2001042106	949-961 Market Street San Francisco Planning Department San Francisco--San Francisco The project would consist of demolition of two existing buildings, including a vacant 40-foot high former theater building and a vacant 66-foot high former commercial building at 949-961 Market Street and construction of a new 12-story-plus-basement, 119-foot tall residential condominium building with 140 dwelling units and 4,250 square feet of retail space. Total new construction would be about 241,200 square feet. The nearly 23,400 square-foot project site is located in the middle of the block on the south side of Market Street between Fifth and Sixth Streets, and is within the C-3-G (Downtown General Commercial) and 120-X Height and Bulk Districts. The building proposed for demolition is designated as a Category V (Unrated) building in Article 11 of the Planning Code. The proposed project would require authorization by the Planning Commission pursuant to Planning Code Section 309, Permit Review in C-3 Districts and Conditional Use authorization.	EIR	12/31/2001

2001118179	Iglesia Ni Christo (Church of Christ) Parking Lot Fish & Game #3 Fremont--Alameda The applicant proposes to improve the parking lot of the Iglesia Ni Christo (Church) located at 39700 Logan Drive, Fremont, Alameda County, by paving the entire lot and providing a drainage system. The system will divert most storm water via constructed valley gutter to a catch basin and then discharge into the Alameda County Flood Control Channel (Line C).	NOE	
2001118180	Seismic Retrofit of Russian River Bridge on Moscow Road Fish & Game #3 --Sonoma Seismic retrofit of the Russian River bridge on Moscow Road at Duncans Mills, Sonoma County. Issuance of a Streambed Alteration Agreement Number R3-2001-0220 pursuant to Fish and Game Code Section 1601.	NOE	
2001118181	Canyon Heights Tank Access Road Improvements Fish & Game #3 Fremont--Alameda The proposed project site is located on an unnamed tributary to Alameda creek at 37908 Canyon Heights Drive, in the City of Fremont, Alameda County, and involves the construction of new storm drainage facilities and improvement of the water tank access road. The proposed project consists of paving an existing unpaved dirt access road (approximately 600 linear feet by 11 feet) to facilitate year-round access and to provide associated drainage improvements to mitigate erosion and overland flow, thereby preventing runoff from flooding adjacent property. The drainage facilities will capture runoff and will be routed to a 100 foot long, 18 inch diameter corrugated steel pipe. The pipe will terminate with an T energy dissipater and a 5'-0" x 11'-3" x 18" rip-rap splash apron, installed below the ordinary high-water mark. Clearing, pipe installation, and non-grouted rip-rap placement will be accomplished manually. Revegetation of the creek embankment is expected to occur naturally. Issuance of a Streambed Alteration Agreement Number R3-2001-0440 pursuant to Fish and Game Code Section 1601.	NOE	
2001118182	Issuance of License Agreement for the California Institute of Technology to Property Along the Colorado River Aqueduct Metropolitan Water District of Southern California --San Bernardino The Metropolitan Water District of Southern California (Metropolitan) proposes to grant the California Institute of Technology license to enter upon Metropolitan property for the purpose of installing and maintaining a seismic sensing equipment vault and adjunct instruments that will aid the study of active faulting and earthquake hazards in Southern California. 2001118183	Raw Water Discharge and Facility Inspection and Maintenance of the Distribution System Metropolitan Water District of Southern California --Riverside Metropolitan Water District of Southern California (Metropolitan) proposes to discharge raw water at 14 locations in Metropolitan's Eastern Distribution System in western Riverside County. This will allow for inspection and maintenance activities inside the structures. The system will be drained at a maximum of 5 cubic feet per second to prevent impacts to vegetation and drainages. No excavation or vegetation clearing will occur, and no new access routes will be required. No significant adverse impacts will result from the proposed discharge.	NOE	
2001118184	Issuance of an Entry Permit for the KB Home, Inc. of Greater Los Angeles to Property Along the Colorado River Aqueduct, Perris Valley Siphon Metropolitan Water District of Southern California Perris--Riverside Metropolitan proposes the issuance of an entry permit for the KB Home, Inc. of Greater Los Angeles to property along the Colorado River Aqueduct, Perris Valley Siphon. The purpose of the Entry Permit is to allow access for the widening of Evans Road.	NOE	
2001118185	Removal and Replacement of Culvert Fish & Game #2 --El Dorado Remove and replace culvert.	NOE	
2001118187	Bank Protection Fish & Game #2 Paradise--Butte Placement of rip rap bank protection.	NOE	
2001118188	Streambed Alteration Agreement Concerning San Mateo Creek Fish & Game #5 --San Diego The proposed project would alter the streambed to allow repair of the Interstate 5 bridges that cross the San Mateo Creek. Erosion has resulted in exposure of the footings at three of the four piers; additional erosion could result in failure of the bridges. The proposed project would stabilize the bridge piers so the structures can withstand additional scour. The project includes: installation of 44 piles around each of the three piers (piers #2, 3 & 4); the new piles will be tied into the existing piers with rebar and the footings will be enlarged to accommodate the new piles; permanent steel sheet piles will be placed around pier 5 to prevent erosion; erosion repair at both abutments consisting of recompacting the slopes, and installing filter fabric and rock slope protection. In order to minimize potential impacts to sensitive species and allow work during minor rain events, the work area will be enclosed within coffer dams constructed of sheet piles. No work will occur outside the coffer dams, and all construction materials and debris will be confined within the dams.	NOE

The construction and demolition/removal activities will occur on different portions of the Olivelands Elementary School site. The proposed new elementary school will consist of four sets of buildings containing nine portable classrooms and six permanent classrooms, a library, a multipurpose room, an administrative office, play fields, and other uses. This new elementary school will be developed on and near the existing playground area. Once the main building has been demolished and removed, this area will serve as the required parking area and the location of the four relocatables used by the Head Start Program.</p>	EIR	01/03/2002

	in 1984), was merged in 1996.		
	To address the conditions outside the Existing Project Areas, the Carson City Council designated a Survey Area for a new redevelopment project area (Project Area No. 4). The Proposed Project Area No. 4 includes 1,232 acres in 12 noncontiguous parcels throughout the City. In addition, various limits in the Redevelopment Plans for the Existing Project Areas are about to be met and must be extended in order to facilitate achievement of Carson Redevelopment Agency's (CRA's) redevelopment goals. Therefore, the CRA is also proposing to amend the Redevelopment Plans for the Existing Project Areas to extend various limits. Finally, the CRA is proposing to merge proposed Project Area No. 4 with the Existing Project Areas to create a single administrative and financial unit. Each individual Project Area would then become a "component area" of the newly merged project.		
2000121009	Source Shifting Agreement with Metropolitan Water District of Southern California for the Environmental Water Account Water Resources, Department of --Los Angeles, San Luis Obispo Lead State Agency, California Department of Water Resources, the U.S. Bureau of Reclamation and Metropolitan Water District of Southern California will defer up to 200,000 acre-feet of Metropolitan's State Water Project entitlement water for use by the Environmental Water Account, a project implementing the CALFED Bay-Delta Program. 2001111111	Yucaipa Valley Water District Non-Potable Water Distribution System Yucaipa Valley Water District Calimesa, Yucaipa--San Bernardino, Riverside The proposed non-potable water distribution system consists of the construction of five reservoirs, four pump stations and associated pipelines. Four of the five reservoirs will have the capacity to store two million gallons each and the fifth will accommodate 1.6 million gallons. The reservoirs and pump stations will be located on vacant lands or within existing development. To distribute the non-potable water, pipeline ranging from 12-to 24-inch in diameter will be installed throughout the proposed distribution area primarily within existing roadways. The main source for the non-potable water will be imported untreated water and to a lesser degree, groundwater pumped from the Yucaipa Groundwater Basin. This MND addresses the construction of two of the five reservoirs, two of the five	Neg	12/17/2001

2001111123	California Men's Colony (CMC) Wastewater Treatment Plant Outfall Replacement Project Corrections, Department of San Luis Obispo--San Luis Obispo The CDC's objectives for the project are the replacement of the existing outfall at the CMC Wastewater Treatment Plant and the significant reduction of streambank erosion within the immediately adjacent areas of Chorro Creek. The replacement of the outfall would prevent the potential catastrophic failure of the structure by providing a structure that would halt the erosion and undermining of the current facility by high velocity flows and the daily release of effluent. The reduction of erosion within areas adjacent to the outfall would stabilize the streambank and bolster the overall integrity of the replacement structure. In addition, the design and operation of the facilities have been discussed with applicable regulatory agencies, and measures that minimize potential effects upon the environment have been incorporated into the project description. The outfall would continue to discharge effluent that would meet State and federal standards.	Neg	12/17/2001

	distribution of high-quality recycled water suitable for unrestricted (but non-potable) uses. Much of the recycled water distribution system has already been installed, with most of the remaining (proposed) pipeline segments to be installed on the golf course properties beginning in May 2002.		
2001112066	<p>Drainage Area 48B - Line A Improvement Project Contra Costa County Community Development --Contra Costa</p> <p>The Flood Control District proposes to replace and upgrade approximately 660 feet of existing pipe and excavation up to approximately 500 feet to 1,000 feet segment of earth ditch in Line A of Drainage Area 48B in the Bay Point Area of East Contra Costa County. The existing 66-inch corrugated metal pipe (CMP) pipe, in the vicinity of Skipper Lane and Port Chicago Highway, runs west to east from an earth channel behind a local shopping center, to the Port Chicago Highway right-of-way where it turns north and across the road where it discharges into an existing earth channel. An internal field review of the pipe showed extensive corrosion in the invert of the pipe throughout, with the upper portion being the worst area. The replacement pipe will be up to an 84-inch reinforced concrete pipe (RCP) or spiral ribbed pipe. The pipe will be constructed deeper than the existing 66-inch line to avoid utility conflicts and will terminate at the existing natural channel at a lower flow line. This will necessitate excavating the channel to a point up to approximately 500 to 1,000 feet downstream. The channel may be widened to the south of the existing channel elevation and be up to 45 inches deeper than the existing channel where the new pipe outfalls into the channel. The new reach of the channel will be hydroseeded and revegetated with native trees and wetland vegetation as part of the project. The existing segment of the drainage ditch will be back-filled. If feasible, a portion of the earth channel may be realigned to run parallel with the property line. The project may be done in phases, over a two-year period.</p>	Neg	12/17/2001

2001092099	Tehama County/City of Red Bluff Landfill Land Acquisition and Facility Improvements Tehama County Red Bluff--Tehama Tehama County and the City of Red Bluff, as the owners of the Landfill, acquired 76 acres of land immediately adjacent to the existing Landfill to expand the facility to approximately 159.6 acres. In conjunction with this land acquisition, Green Waste of Tehama (contract operators) developed plans and constructed a Material Recovery Facility (MRF), composting operation, Household Hazardous Waste facility (ABOP-antifreeze, batteries, oils and paints), and sediment control ponds on the additionally acquired land. In addition, gas management system facilities are proposed for construction. The additional operations must be approved by the appropriate regulatory agencies before they can be operated at the site. The incoming waste volume at the site averages approximately 137 tpd. With the proposed MRF, composting facility, and associated operations the site will easily have the ability to handle an average of 200 tpd and peak rates of 300 tpd. However, the Landfill is currently permitted to handle only an average of 100 tpd. Therefore, the operator proposes to submit an application to the Tehama County Department of Environmental Health, which also serves as the Local Enforcement Agency (LEA), State of California (RWQCB) to amend the permit to allow up to 300 tpd. Notification to the State of California Department of Conservation Director regarding the acquisition of 11.02 acres of Williamson Act contracted land for a public improvement must be completed and is a component of the Project.	NOD	
2001119022	UCSF Fresno Medical Education and Research Center Fresno, City of --Fresno The proposed project is a 82,030 gross square foot three-story structure to accommodate faculty offices, medical education, and office-based research at the Community Medical Center in Fresno. The University of California at San Francisco maintains a variety of programs in Fresno, and this facility will enable the consolidation of several of those programs, as well as support expansion of existing programs. The project will replace academic teaching space due to be lost by the closure of University Medical Center, the former County Hospital in December 2003.	NOD

2001118201	Inyo County Sheriff Communications System - Submittal for Professional Services Agreement Inyo County Planning Department --Inyo The project is an upgrade of the Inyo County Sheriff's Communication System at already established sites in Inyo County (unincorporated). Project consists of the replacement of communications equipment in Transmit/Receiving sites with no physical alteration to the buildings that house these sites.	NOE	
2001118202	Fitness and Rehabilitation Center Renovation Humboldt County Arcata--Humboldt Expansion of existing Fitness and Rehabilitation Center from 500 square feet to 2,000 square feet.	NOE	
2001118203	Berry Summit Sand Storage Facility Caltrans #1 --Humboldt The California Department of Transportation (Caltrans) proposes to construct a 298 square meter sand storage building at the southeast corner of the intersection of State Route 299 and Titlow Hill Road in Humboldt County. The project location is approximately 15.7 kilometers west of Willow Creek, and approximately 46.8 kilometers east of Arcata. Construction of the new sand storage building would include an asphalt concrete access road from Titlow Hill Road, culvert installation, site grading and paving, perimeter fencing, extension of utilities, drainage improvements, including sand traps, and landscaping. The purpose of the project is to provide a new sand storage facility due to deficiencies of the current facility located at KP 54.8.	NOE	
2001118205	Salinas VHF/MW Shop General Services, Department of Salinas--Monterey The Department of General Services, Telecommunications Division proposes to lease approximately 2,500 square feet of existing space to house telecommunications equipment. Plans call for eight non-exclusive parking spaces and three employees will work at the facility.	NOE

<u>Documents Received on Monday, November 19, 2001</u>			
2001112074	Rezone Application No. 2001-21-Crossroads Feed and Ranch Supply Stanislaus County Waterford--Stanislaus Request to change the zoning from Planned Development 116 to a new Planned Development to allow the expansion of the existing feed and seed ranch supply business; clarify the retail sales position of the site; and improve on-site circulation on a 9.97+ acre site. (PD 116, approved in 1985, allowed the following: chemical sales, agricultural equipment maintenance shop, use of a public scale, protein sales to dairies, irrigation equipment supply business, and storage and light manufacturing of agricultural equipment.)	CON	11/29/2001
2001111133	Atwater Freeway Project Caltrans Atwater--Merced The California Department of Transportation (Caltrans) proposes to convert a 4.3 kilometer (2.7 mile) segment of State Route 99 (SR-99) in Merced County from a four-lane expressway to a six-lane freeway. This project would involve realignment east of and parallel to the current alignment. The proposed project would remove all at-grade intersections within the project area. Local traffic would be served by the extension of a frontage road that connects to a planned interchange to be located at the Westside Boulevard/Central Avenue intersection with SR-99.	EA	12/21/2001
1994123007	San Francisco Cruise Terminal Mixed Use Project & Brannan Street Wharf Project (2000.1229E) San Francisco, City and County of San Francisco--San Francisco The proposed project would involve the construction of two berths, (including necessary dredging) and a new terminal for cruise ships that call at the Port of San Francisco, as well as ancillary commercial development, and new public open space uses, all on Pier 30-32. The proposed project also includes construction of a residential component on Seawall Lot 330, across the Embarcadero from Pier 30-32. The DSEIR will also analyze a separate but related project involving the design and construction of the Brannan Street Wharf, a new, approximately 57,000-square foot waterfront park along the Embarcadero.	EIR	01/02/2002
2001051100	Renaissance Terrace Oceanside, City of Oceanside--San Diego The proposed project is for the construction of a 96-unit luxury condominium complex and all associated general site improvements on a 7.5-acre site within the City's Redevelopment Project Area.	EIR	01/11/2002

	Agency redevelopment activities will include, but are not limited to, structures, public walks and buildings, infrastructure improvements, such as drainage, circulation improvements, water distribution system and wastewater collection system improvements, and redevelopment assistance programs such as low-interest loans. The possible actions are not proposed projects at this time, but are possible activities that may be undertaken in conjunction with the Amendment.		
1992113072	Sonoma County Integrated Waste Management Plan Update Sonoma County --Sonoma Sonoma County Waste Management Agency will prepare an update to the 1996 Countywide Integrated Waste Management Plan to include new programs and facilities.	NOP	12/18/2001
1998031053	Bel Marin Keys Unit V Wetland Restoration Project Coastal Commission Novato--Marin The project area historically supported subtidal bay, tidal wetland, and possibly freshwater marsh habitat but levees constructed during the 19th century separated the area from the tidal influence of San Pablo Bay and drained the site. The area has remained in agricultural use for the last century and it currently supports hay production. The site has subsided to a subtidal elevation. Approximately 90 percent of the tidal wetlands that existed around the San Francisco Bay in 1800 have been destroyed by diking or filling for purposes of agriculture, development, or salt production.	NOP	12/31/2001
2001111129	City of Imperial Redevelopment Project Imperial, City of --Imperial The primary objective of the Plan is to provide the basis for a variety of redevelopment activities designed to eliminate blight conditions found to exist in the Project Area. However, no specific redevelopment activities are being considered with the Plan's adoption. Long-term implementation of the Plan may include, but will not necessarily be limited to, the following: funding and construction of affordable housing; construction, reconstruction and improvement of structures, public walks and buildings; infrastructure improvements, such as drainage, circulation improvements, water distribution system and wastewater collection systems improvements; and redevelopments, water distribution system and wastewater collection system improvements; and redevelopment assistance programs such as low-interest loans. The above listed redevelopment activities are not proposed projects at this time, but may be the general kind of future actions undertaken by the Agency and/or others after the Plan is adopted.	NOP	12/18/2001
2001112031	Lakeside Trail Phase IIA - Truckee River Outlet Crossing Tahoe City Public Utility District --Placer On May 23, 1996, the Tahoe Regional Planning Agency (TRPA) and the California Office of Planning and Research issued a Notice of Preparation of an Environmental Impact Report/Environmental Statement (EIR/EIS) per CEQA and NEPA requirements for the Community Trail Intertie Project. The EIR/EIS was completed in July 1999 and portions of the Community Trail Intertie Project are	NOP	12/26/2001

2001082124	Santa Maria Museum of Flight Santa Maria, City of Santa Maria--Santa Barbara Relocation and expansion of the Santa Maria Museum of Flight. 26,324 square feet of building space built in two phases.	Neg	12/18/2001
2001111124	Issuance of a Hazardous Waste Facility Permit for General Atomics Toxic Substances Control, Department of La Jolla, Del Mar--San Diego The proposed hazardous waste facility permit would allow General Atomics (GA) to continue operating its existing treatment and storage units and to add two container rinsing units to manage mixed waste generated onsite. Mixed waste is defined as a hazardous waste which contains a radioactive component. GA was granted interim status on March 23, 1989 to treat and store mixed waste. The mixed waste is generated from on-site activities such as research and development (R&D) projects, and as the facility decommissions and decontaminates the R&D projects. No more than 5,060 gallons of liquid mixed waste and 32,500 cubic feet of solid mixed waste may be stored. Mixed waste storage is limited to one year. The storage of mixed waste is necessary to allow for the consolidation, profiling and the availability of off-site treatment and disposal facilities. Limited quantities of mixed waste may be treated on-site by physical means, chemical neutralization, and stabilization. The permit authorization requires GA to manage mixed waste in a manner that is protective of human health and the environment. The permit limits GA to store mixed waste in sealed containers, in secure, designated areas. All operations will occur in existing facilities. No other activities or changes to the facility or changes to the facility's operations are allowed.	Neg	12/18/2001

2001111131	SR-99/White Lane Interchange Reconstruction Project Bakersfield, City of Bakersfield--Kern The proposed improvements involve the widening of White Lane at SR-99, improvements to the interchange and construction of an auxiliary lane at the southbound exit ramp.	Neg	12/18/2001
2001111132	EA LO 5-01, Conditional Use Permit No. 6, Map 98-13 (CalPeak Power-Midway, LLC) Kern County Planning Department --Kern Conditional use permit authorizing the construction and operation of a 49.5 megawatt, simple cycle, gas turbine electrical power plant. Includes the use of 1.7 adjacent acres as a temporary construction laydown area (180 days). Unmanned facility. Water supply by new water well. No sewage disposal is proposed. Approved Authority to Construct from San Joaquin Valley Air District.	Neg	12/10/2001
2001111134	City of Gonzales Water Tank Gonzales, City of Gonzales--Monterey The project includes construction of a 2.5 million-gallon water tank to augment the City of Gonzales' existing water distribution system. This tank will be located adjacent to the City's existing one million-gallon (1.0 MG) tank located in Monterey County jurisdiction and northeast of the City at the intersection of Johnson Canyon Road and Iverson Road. The need for this tank is discussed in the General Plan Chapter VII, Section B.1. Though the General Plan references a new tank, its location was not determined until recently. As stated in the Gonzales General Plan Environmental Impact Report, the existing storage capacity of 1.0 MG is inadequate for projected domestic and fire fighting purposes. A twelve-inch water line currently connects the existing tank to the City's water distribution system. The new tank implements the City's April 2001 Water System Master Plan. The property owner will provide the City an easement on a 150 x 300-foot portion of the 110 acre-parcel on which the tank will be located.	Neg	12/18/2001
2001112072	GPA-01-03/Prezone 01-01/Annexation 01-09 (Sterling University Housing) Chico, City of Chico--Butte Proposed amendment of the City of Chico general plan land use designation and rezoning for parcels and annexation of these parcels into the city limits. The existing manufacturing and warehousing general plan designation would be changed to Medium-High Residential (14-22 units/acre) and the existing rezoning would be changed from MC to R3. A 320-unit apartment complex is proposed on two of the parcels (20 acres). No development is currently proposed for the remaining two parcels.	Neg	12/19/2001
2001112075	Use Permit No. 01-20/Variance No. 01-05 Oroville, City of Oroville--Butte Construct a new 66-room, 3-story hotel and place an off-premises monument sign for the hotel on the adjacent property to the west, on which a new 24-hour restaurant will be constructed (no use permit approval is required for the proposed new 4,000 square foot, 160-seat restaurant). Also, provide only 199 of 223 total	Neg	12/18/2001

2001092075	Konocti Camp Wastewater Disposal System Forestry and Fire Protection, Department of Santa Rosa--Lake Remodeling of the existing wastewater treatment system will include the following construction work and added infrastructure: Adjacent to an existing septic tank at the campsite, a new septic tank will be installed. An above ground wastewater treatment plant will be in the vicinity of the new septic tank; the wastewater treatment plant dimensions are approximately 12'W x 50'L x 11'H. The wastewater treatment plant will be placed upon an approximately 16' x 56' slab on grade. Trench excavation work to allow connection of these systems to the existing wastewater lines will be completed. An underground pipeline to transfer treated effluent from the treatment plant and new septic tank to the ridge top site of a new leach field will be installed approximately 2 ft below the surface along an existing access road a distance of approximately 1,000 ft. A new leach field will be installed to the Southeast of an existing helipad at the campsite; the leach field will consist of 40, 100-ft trenches approximately 5.5 ft deep with 10 foot spacing and covering an area of approximately 200' x 200'. A second new septic tank will be installed adjacent to the leach field that will allow metering of the treated effluent into the leach field system. Three 100-ft deep (approximately 4" diameter) monitoring wells will be installed around the new leach field. An additional reserve leach, also approximately 200' x 200', may be installed at the ridge top site and North of the existing helipad.	NOD	
2001101024	Murrieta Oaks Murrieta, City of Murrieta--Riverside The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement (SAA # 6-2001-139) pursuant to Section 1603 of the Fish and Game Code to the project applicant, Pacific Communities Builder, Inc.. The applicant proposes the construction of 230 residential units and one open space lot, which will encompass approximately 54 acres. An unnamed blueline stream, which flows southward via a natural, unlined channel across the northwest corner of the proposed project site for 1,072 linear feet before exiting the site via a 90-inch metal culvert under the Interstate 15 Freeway and ultimately draining into Murrieta Creek, is proposed to be piped below grade at the northern portion of the drainage for a total of 650 feet, which will flow underneath a proposed on-site detention basin and then empty into the proposed open space (the lower portion of the drainage). The project is located in the City of Murrieta in Riverside County.	NOD	
2001102018	Alexandria Estates (EIAQ-3501) Placer County Planning Department --Placer Ten residential lots, ranging in size from 20,006 square feet (sq ft) to 22,640 sq ft, and a 4.8 acre common open space lot on 11.2 acres.	NOD

2001119024	Vesper Groves Estates Major Residential Subdivision; TM 5232RPL2, Log No. 00-08-048 San Diego County Department of Planning and Land Use San Diego--San Diego The project proposes a 7-lot major subdivision for single-family residences on 16.73 acres.	NOD	
2001129001	McKenna Heights Boundary Adjustment San Diego County Department of Planning and Land Use --San Diego The project proposes a boundary adjustment of approximately 21.42-acre parcel of vacant land. The project would result in the reconfiguration of four existing legal parcels (Parcel 1,2, 3, and 4 of PM 10419), with the possible future subdivision potential of the largest new parcel being a part of this environmental analysis. The applicant has granted an Open Space Easement over the riparian area onsite.	NOD	
2001118204	Archeological Testing - Phase II Parks and Recreation, Department of --Tulare Conduct archeological test excavations at Colonel Allensworth State Historic Park to determine original footprint, location, and building information for the Dodson House, Phillips House, and Hindsman Store, for use during reconstruction of these structures.	NOE	
2001118206	Rancho Temescal Culvert and Drain Pipes Fish & Game #5 --Ventura Installing two surface drain inlets and install a pipe culvert under an existing dirt road.	NOE	
2001118207	Rancho Temescal Domestic Water Line Attached to Piru Creek Bridge Fish & Game #5 --Ventura Attaching a new domestic pipeline to the existing railroad bridge spanning Piru Creek.	NOE	
2001118208	Swanson Property Oakley, City of Oakley--Contra Costa The proposed project is the purchase of two parcels by the City of Oakley. The parcels are currently vacant. The city will use the parcels for a governmental purpose in the future.	NOE	
2001118209	Greenhorn Creek Rehabilitation Fish & Game #2 Quincy--Plumas Streambed Alteration Agreement R2-2001-497 pertaining to the Greenhorn Creek Rehabilitation project. Authorized activities include installation of five boulder vanes to reduce bank erosion along a 1,000 linear foot reach of Greenhorn Creek.	NOE

2001118265	College Heights SE Property Maintenance Project Chino Basin Municipal Water District --San Bernardino The maintenance project involves the clearing and grubbing of vegetation and debris deemed a nuisance to the management of the property. The purpose of the project is to enable the District to more efficiently maintain the property into the future, to reduce the potential for fires, and to remove vagrant hiding places. It will also allow the perimeter of the property to be landscaped to improve its appearance to the general public. The District, the local neighborhood and the general public are the beneficiaries of this project.	NOE	
2001118266	Whitewater River Grading Work Fish & Game Eastern Sierra-Inland Deserts Region --Riverside The project consists of the reconstruction of two protective earthen berms used to channel flood waters from the river over the Colorado River Aqueduct (CRA), located on the upstream side of the southernmost barrel and extending northward in the stream area, through the removal of sandbars, which are the result of flash floods, and the placement of the material, approximately 700 cubic yards of soil and rock, alongside the river for the reconstruction of 800 linear feet of each dike. The total area affected by the maintenance activity, involving the use of Caterpillar D-4 and D-7 dozers, is 4.6 acres, including the areas outside the bed and bank of the normal flow channel.	NOE	
2001118267	3M Plant Tree Trimming Fish & Game Eastern Sierra-Inland Deserts Region Corona--Riverside The project consists of the clearing of vegetation from around existing electrical transmission wires that cross over Temescal Wash; the trimming of vegetation is to be within twenty (20) feet on either side of the wires to a height of fifteen (15) feet below the wires.	NOE	
2001118268	Singleton Construction Boat Launch Ramp Fish & Game Eastern Sierra-Inland Deserts Region Big Bear Lake--San Bernardino The project consists of grading of the lake bottom using a ladder backhoe in order to install concrete forms and rebar for the construction of a launch ramp measuring 10 feet by 30 feet. A toe ditch will be dug on three sides of the ramp with filter fabric and a minimum of 12" rock installed for erosion protection.	NOE	
2001118269	BLM Springs Vegetation Management Fish & Game #7 --Mono The Operator proposes to control emergent vegetation in the BLM Spring channel with hand-held and boat mounted gas powered reciprocating cutters and hand tools. Currently, there exists an unnatural abundance of aquatic vegetation	NOE

	resulting from artificial ponding of water. This artificial ponding has now been reversed. The aquatic plants will be cut below the waterline, and the cut tops will be piled onto adjacent "tule thatch" and left to decompose out of the water. Submerged roots and stems will be removed by hand or with hand tools in problem areas, and distributed on the tule thatch. Water flow which is currently dissipated as over-bank flow will gradually concentrate back in the historic channel after the blockage is removed. Work to facilitate removal of largemouth bass may occur at any time of year. Aquatic vegetation clearing will be done between September 1st thru March 15th to avoid potential impact to bird nests. Over time the effort and amount of plant material removed is expected to decline precipitously to maintenance levels. Regular maintenance 1-2 times per year is expected to keep the channel clear.		
2001118270	Los Angeles Unified School District, Proposed Hobart Elementary School Addition Site, Removal Action Workplan Approval Environmental Protection Agency, California Los Angeles, City of--Los Angeles A Removal Action Workplan (RAW) will implement clean-up procedures at the site for the excavation and off-site disposal of soils contaminated with lead. During the proposed excavation, no students, faculty or unauthorized persons will be on the site.	NOE	
2001118271	Santa Felicia Dam Lower Access Road Easement Acquisition Project United Water Conservation District --Ventura The proposed easement follows the alignment of the old County Road, upon which lands the legal rights-of-way were abandoned by the County in 1962. United Water continued to maintain this stretch of road, repairing it after major spills from Santa Felicia Dam, which typically erodes a portion of the road. United Water has utilized the road for purposes of public safety by way of continuing the ability to perform the proper maintenance of the facilities at Santa Felicia Dam. Heavy equipment cannot access important areas of the Dam property by alternative routes. Additionally, United Water's Dam Tender is housed at the site, providing additional emergency response and public safety functions. General services to the Dam Tender's residence and other United Water Facilities will continue as they have since 1962. The proposed easement will document a right of passage over the land and compensate the present property owner for encumbrance of title.	NOE	
2001118272	Santa Susana Mountains-Simi Hills Wildlife Corridor Santa Monica Mountains Conservancy --Ventura Acquisition of three parcels (APN: 648-270-37-0, 648-260-03-0, 648-260-01-0) to protect a critical section of the inter-mountain range habitat linkage from the south side of the 118 freeway to the core habitat of the Simi Hills ecosystem.	NOE	
2001118282	Transfer of Coverage to El Dorado County Tahoe Conservancy --El Dorado Project consists of the sale and transfer of 300 square feet of potential coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to	NOE

	feature an operational 8-helicopter (UH- 60 Blackhawk) pad located at Hangar Building 761 and two MEP parking areas at SCLA are being evaluated; site 605 and site 562. Alternative A, the stationing requirements for both personnel and equipment would be identical to those described in the proposed Action. The ASF activities would be conducted at Yermo. The proposed MEP site at Yermo is located at Site 593. The No-Action Alternative would maintain status quo deficiencies in training facilities for USAR personnel in Southern California. Existing activities and uses of SCLA and Yermo would continue, and USAR ASF and MEP operations would not occur at either location as currently proposed.		
2001111137	Demolition, Reconstruction, and Expansion of Abraham Lincoln High School San Diego Unified School District San Diego--San Diego The proposed acquisition will affect surrounding single-family and multi-family dwelling units on up to approximately six acres of adjoining property. The proposed project may include the demolition and/or removal of existing school and residential structures. The school will be reconstructed with approximately 250,000 to 260,000 square feet of permanent one- to four-story classrooms and support facilities. The new facility will serve up to 3,000 students from grades 9-12 from the Gompers Secondary School Senior High Program. The proposed school expansion may include additional athletic fields, a reconstructed football stadium, a new gymnasium, and/or a performing arts building.	NOP	12/19/2001
2001112071	Edgewood Center Redevelopment Project Palo Alto, City of Palo Alto--Santa Clara The proposed is the establishment of a Redevelopment project for the purpose of redeveloping and revitalizing the Edgewood Shopping Center. The redevelopment project proposes to revitalize the Edgewood center by demolishing the existing facilities and replacing them with retail and housing. The existing Albertson's Supermarket would be replaced with a new, modern facility that would be approximately 20,000 square feet. A 4,000 square feet drug store will also be constructed adjacent to the grocery store. The combined square footage for the Albertson's and the drug store would be approximately 24,000 square feet. The other retail facilities would be replaced by a new 15,000 sf building that would accommodate 10 to 12 small retail business. Current retail tenants that cannot afford to remain on site would be relocated in accordance with redevelopment law. In addition, the project would construct 38 to 49 housing units on site and a small park. Approximately sixteen apartments will be built above the new retail facilities, the remaining residential units will consist of townhouses located at grade around the site. To comply with redevelopment law, a percentage of the new residential units would qualify as low income housing. Parking for on-site residents would be structured parking at grade (tuck under parking for the townhomes and structured parking located under the retail facilities for the apartments). Surface parking would be provided for the retail facilities. The project may also include housing units on the existing office site.	NOP	12/19/2001

2001112079	Solano County Government Center Solano County Fairfield--Solano The Board of Supervisors has directed that the construction of two new structures be included in Phase 1 of this Master Plan. These include a new office building of up to seven stories in height, containing up to 300,000 square feet, with approximately 55 at-grade parking spaces [bldg. 1A], and a new parking structure of up to five stories in height with approximately 1,000 parking spaces [bldg. 1B]. Another approximately 150 parking spaces will be provided in at-grade parking lots at various sites around the County Administration Center. Phase 1 of this Master Plan also includes two new support buildings [bldgs. 1C & 1D] with a combined floor area of up to 25,000 square feet. While the Board of Supervisors has not explicitly directed that these buildings be constructed, the Board has directed that the feasibility and potential environmental impacts of these buildings be studied as part of Phase 1 in the event that the Board chooses to go ahead with construction of these buildings. These buildings will contain a mix of government, private office, and/or commercial uses consistent with the City of Fairfield's General Plan and zoning regulations. The Board has also directed that the feasibility and potential environmental impacts of a new two-story probation building [bldg. 1F], containing approximately 35,000 to 40,000 square foot buildings, be evaluated as part of Phase 1, also in the event that the Board chooses to go ahead with construction of this building. 2001118324	<p>Ceres High School-Addition of Eight Emergency Portable Classrooms Ceres Unified School District Ceres--Stanislaus</p> <p>Ceres High School was originally designed for 900 students and currently houses 2,454 students in 90 classrooms. Approximately 50% of these classrooms are portables, most of which are provided by the State of California under the emergency portable program. Currently, Ceres High School needs two classrooms to accommodate current year growth. The school is projected to need two additional classrooms per year for growth and another two classrooms to implement class size reduction in math. The District proposes to add eight State emergency portable classrooms on the east side of the campus. The portable classroom will be placed wholly within the existing campus so no land acquisition will be required. The eight classrooms will be temporary because voters approved a local general obligation bond in the amount of \$25 million to construct a second high school in Ceres. The second high school is scheduled to open in 2005 and will relieve overcrowding at Ceres High. The eight emergency portable classrooms will be installed in early 2002. The purpose of the project is to provide additional classrooms for growth and class size reduction. The direct beneficiaries of the project are the high school students, the faculty, and the administration.</p>	NOE

1991113077	Lake Elizabeth Master Plan Fremont, City of Fremont--Alameda The California Department of Fish and Game (DFG) is executing a Lake and Streambed Alteration Agreement (R3-2001-0359) pursuant to Section 1601 of the Fish and Game Code to the project applicant, George Sukkar/Alameda County Public Works Agency. The applicant proposes to remove approximately 75,000 cubic yards of sediment from approximately one-half of the lake and distribute that sediment over settling basins adjacent to the lake. A floating dredge would be used to remove the sediment in a water slurry, which would then be transported through pipes to the settling basins. Sediment would be allowed to settle out of the water before the water would be returned to the lake. The project is necessary to increase the storage capacity of the lake and enhance its flood protection capacity prior to the onset of the winter rainy season. The project is located at Lake Elizabeth in an 82-acre man-made lake southeast of Fremont, California, in Alameda County (Section 34, Township 4 South, Range 1 West, Assessor's Parcel Number 525-0001-010-00). The lake was constructed in 1966 to provide flood protection for the area during periods of high rainfall.	NOD

2001118338	Petition for Time Extension State Water Resources Control Board, Division of Water Rights -- The existing project received a water permit (Application 28924, Permit 20185, dated October 26, 1986) for the storage of up to 6.6 acre-feet per annum (AFA) in two existing on stream reservoirs (capacities 0.4 and 6.2 acre-feet). Additionally, the project was permitted for the direct diversion of up to 400 gallons per day (gpd) for stock watering, January 1 to April 30, and 8,500 gpd for irrigation, March 1 to April 30 of each year. The property changed owners approximately seven years ago and the new owners were not made aware of the existing water right. Currently the 0.4 acre-foot reservoir is operational. However, the 6.2 acre-foot reservoir has a breach in the dam and does not store water. Permittee has indicated he is now a full-time resident at the property and intends to repair the dam and develop the property. Consequently, the Permittee has filed this petition for an extension of time to put all of the water authorized by water Permit 20185 to full and beneficial use. The Petitioner proposes to repair the dam and put the water to full beneficial use by December 31, 2011.	NOE

2001112093	<p>Downtown/Natomas/Airport Alternatives Analysis/Draft EIS/EIR Sacramento Regional Transit District --Sacramento</p> <p>The Federal Transit Administration (FTA), as joint lead agency with the Sacramento Regional Transit District (RT), will prepare an EIS/EIR on a proposal to improve transit service in an approximately 13-mile-long corridor through South and North Natomas in Sacramento, California. The study area begins in downtown Sacramento at 7th and H Streets. Traveling north, the proposed corridor alternatives would cross the Union Pacific Railyards and the American River, possibly on a new bridge. The corridor alternatives would pass through South Natomas, cross Interstate 80, and enter North Natomas. The terminus of the study area would be reached by crossing State Route 99 and connecting to the Sacramento International Airport, located approximately 13 miles northwest of downtown Sacramento. Alternatives to be considered include both modal alternatives (e.g., bus service improvements, light rail extension, bus rapid transit service) and corridor alternatives. To date, 11 alternatives have been identified to be addressed in the EIS/EIR. The EIS/EIR will examine potential changes to the physical, natural, and social environment. Impacts will be identified both for the construction period and for the long-term operation of the selected alternative. Potential impacts to the physical environment include air pollution associated with construction and the potential of the long-term air quality benefits. These impacts will be assessed using air quality models that can simulate the project's contribution to regional air pollution (both positive and negative effects). The analysis of potential effects to the physical environment will also include hydrology, water quality, and soil considerations. Rare habitat types and sensitive fish, wildlife, and plant species will be considered in the assessment of potential impacts to the natural environment. Biological surveys will be conducted to</p>	NOP	12/26/2001

	new chilled water facilities with existing chilled water facilities and future campus buildings. Future improvements include a second 2.7-million-gallon tank and an additional 4,000 gallons of chiller capacity.		
2001112102	Newark Housing Element Update Newark, City of Newark--Alameda Update of Housing Element.	Neg	12/26/2001
1997071030	Composting of Organics: Greenwaste, Biosolids, Food Production Waste Colton, City of Colton--San Bernardino Establishment and operation of a mixed feedstock composting operation by inland composting and organic recycling. The proposed composting operation will occupy 72 acres of vacant land zoned M-1 (Light Industrial) and M-2 (Heavy Industrial). The proposed project will establish a composting facility designed to process up to 1,000 wet tons per day of green waste (including yard trimmings, wood, paper, cardboard, and recycled compost) and organic food production waste, restaurant food wastes, agricultural by-products, and 700 wet tons per day of other organic non-hazardous wastes including manure and biosolids (municipal sewage sludge) from regional wastewater treatment plants and inert materials such as soil, gypsum, and clean concrete from construction and demolition activities. The composting process will involve grinding and mixing of certain feedstocks and bulking materials and placement into windrows. The windrows will be turned a minimum of five times and maintained at or above 55 degrees Celsius during the 15 day "High Temperature" part of the composting process. Finished compost will be tested and stored on site for eventual sale as soil, amendments and other uses.	NOD	
2001091006	Mission Trails Regional Park-Multi Use Staging Area San Diego, City of San Diego--San Diego The proposal is the development of a twelve-acre, multi-use staging area to improve access to the City's Mission Trails Regional Park by horse riders, hikers, and bicyclists to the existing park trail system. The proposed improvements include a 5,000 square foot (sf) main structure, containing a park maintenance facility, park ranger offices, conference room, display room with information counter, park staff restroom with shower, garage, group kitchen, public restrooms and storage room, a 2,300 sf covered group picnic shelter attached to the west side, and a screened storage yard attached to the east side. There would be a separate, 425 sf service building containing public restrooms, 15-space parking lot for horse trailers, 49-space parking lot for other vehicles, horse corrals, two multi-purpose rings, open BBQ area, picnic tables, horse manure storage bins, minimal security lighting, and internal loop access road. The maximum height of the main structure would be 26 feet, 10 inches; the height of the roof over the group picnic area would be a maximum of 18 feet, 9 inches.	NOD

The modification consists of the construction of one library, one office building and 16 10-by 10-foot prayer closets. In addition, a portable tent is to be constructed on the existing baseball field for Sunday Services. A new sign (10 feet by 7 feet) is also proposed. Proposed religious uses for the site include prayer school (50 students per day), Sunday Services and Wednesday (up to 200 people), special events (camping for 50 handicapped children), monthly revivals (up to 200 people), and weddings (up to 200 people). Access to the project site is from Highway 67.	Neg	12/28/2001
2001112105	Gold Ridge Phase 2 Fairfield, City of Fairfield--Solano Tentative Subdivision Map for approximately 268.3 acres of land located west of Peabody Road, north and south of the Putah Canal and east of Clay Bank Road into 919 single family lots and 31 miscellaneous parcels for open space, landscape parkways, utilities and future public use (School and Park) sites. Improvements include two off-site water reservoirs north of the development, and off-site roads, sewer and water line extensions south of the development area. The project also includes request for PUD Permit and Development Review of proposed house plans to be developed on 309 lots within that portion of the site commonly identified as Neighborhoods 7, 8 and 12 on the Gold Ridge Planned Development Overlay. 2001102108	Evening and Nighttime Bus Service Implementation Project San Mateo County Transit District --San Mateo, San Francisco, Santa Clara Proposal consists of the addition of evening and nighttime bus service on new SamTrans Route 397 running through the following jurisdictions: Daly City, Brisbane, South San Francisco, San Bruno, Millbrae, Burlingame, San Mateo, Belmont, San Carlos, Redwood City, Atherton, East Palo Alto and Menlo Park, as well as portions of the City and County of San Francisco and Palo Alto in Santa Clara County.	NOD	
2001118369	Agreement No. R4-2001-0146; Unnamed Tributary to Coarsegold Creek, Remediation Site Fish & Game #4 --Madera Construction of a temporary 30-foot by 30-foot by 3-foot thick building pad and access road for environmental remediation equipment. Installation of one 36-inch temporary culvert along the entrance road.	NOE	
2001118383	Foot Bridge Replacement Fish & Game, Wildlife Conservation Board Citrus Heights--Sacramento Replacement of an existing foot bridge over Mariposa Creek.	NOE	
2001118384	Culvert Installation for Driveway Construction Fish & Game #2 --Sacramento Install two culverts for driveway access.	NOE	
2001118385	Culvert Installation for Driveway and Road Construction Fish & Game #2 Oroville--Butte Install two culverts for driveway construction and one culvert in ditch for road extension.	NOE	
2001118386	Bank Stabilization of Langelly Creek Fish & Game #3 --Monterey The project consists of the stabilizing of approximately 100 feet of bank on Langelly Creek, a seasonal drainage, between Messick and Tustin Roads, City of Prunedale, in Monterey County at PM 96.69. The need for the project is due to ongoing erosion that is threatening to undercut Highway 101 along the right-hand northbound lane. The repair will consist of installing rock-filled gabion baskets for a length of approximately 28 meters. There will be two base layers of baskets, approximately 3 meters wide, stepping up from the base to the roadway with the upper layers approximately 2 meters wide. At the downstream end of the proposed gabion wall an existing culvert will have approximately 13.5 cubic meters of rock placed at its outfall to dissipate energy and reduce erosion. Issuance of a Streambed Alteration Agreement Number 2001-0844 pursuant to Fish and Game Code Section 1601.	NOE

2001118387	Replacement of Three Existing Culverts Fish & Game #3 Sausalito--Marin The proposed project is located on an unnamed drainage south of the end of Spring Street, PM 2.15 Highway 101, Sausalito, Marin County, California. The work is at the headwaters of the drainage where flows from springs, highway runoff and drainage exit, via three pipes, at a dissipation structure on the hillside. The existing rusted three CMP's and dissipation structure will be replaced. To accomplish the project the flows from the 3 CMP's will be temporarily collected into a single flexible pipe and diverted around the work area with flows being released just below the dissipation structure. Issuance of a Streambed Alteration Agreement Number R3-2001-0913B pursuant to Fish and Game Code Section 1601.	NOE	
2001118388	California Rehabilitation Center Norco Potable Water System Improvements Project Corrections, Department of Norco--Riverside The proposed project would make improvements to the existing water facilities at the California Rehabilitation Center (CRC) Norco. The project is needed to bring CRC's water facilities into compliance with water quality standards, pursuant to Order No. 04-14-98CO-004, issued by the State Department of Health Services to CRC Norco. The project would include: replacement of existing fire hydrant assemblies and installation of several new fire hydrant assemblies; replacement of selected segments of water distribution pipeline and installation of approximately 3,000 lineal feet of new pipeline from the existing upper reservoir to the existing on-site distribution system; re-coating the interior of the lower reservoir consisting of a welded steel tank. The project would also correct existing high-hazard cross connections at CRC, replace broken isolation valves on the water distribution system, and replace existing pressure reducing valves. The project would accommodate the existing inmate population with no expansion of the current use.	NOE	
2001118389	Carrizo Creek Road Re-Route (10/02-CD-18) Parks and Recreation, Department of --San Diego Project consists of rerouting vehicle traffic around a perennially wet section of Carrizo Creek. The reroute will continue to allow access along Carrizo Creek to the Carrizo Stage Station and to the west boundary of the Carrizo Impact Area. All work will be done to minimize the impact to cultural and natural resources. All construction activities will be carried out between September 15 and March 15 to avoid impacts to sensitive animal species.	NOE	
2001118390	Rolling M Residence Yard Fence (01/02-IE-07) Parks and Recreation, Department of --Orange Project consists of replacing a portion of the existing split rail fence located around the employee residence.	NOE

feet in width and extends for approximately 625 linear feet from the existing concrete channel to the Baker Ranch entrance road crossing near the western terminus of Commercentre Drive. The stream supports scattered mule fat on its margins. The open trapezoidal channel will be constructed along 625 linear feet of the stream and will be approximately seven feet in width and approximately 2.5 feet deep. Permanent impacts to the stream total approximately 9,375 square feet (0.21 acre). The mule fat will be quantified and replaced at a 2:1 ratio adjacent to the reconstructed channel. No construction will occur during the coastal California gnatcatcher breeding season, February 15 to July 15.

2001021112	Cockatoo Middle School Hawthorne School District Hawthorne--Los Angeles In response to a rapidly growing student population, the District plans to construct and operate a new middle school to accommodate approximately 1,500 students. The existing development on the site will be demolished prior to construction of the school campus. The campus will include one, two and three-story academic facilities, administrative and support facilities, and athletic facilities and play fields.	EIR	01/14/2002
2001022015	Laguna Honda Hospital Replacement Project San Francisco Planning Department San Francisco--San Francisco The proposed project is the demolition and replacement of some of the existing facilities at the Laguna Honda Hospital and Rehabilitation Center, located on the western slopes of Twin Peaks in central San Francisco, and construction of additional facilities and parking spaces. The project includes: 1) demolition of all existing hospital facilities except the front wings of the Main Hospital Building; 2) construction of four new hospital buildings; 3) construction of an assisted living facility; 4) expansion of existing outpatient programs and services; and 5) reconfiguration and expansion of existing parking facilities. The new buildings plus the retained building area would total about 987,000 gross square feet (gsf), approximately 282,500 gsf more than the existing building area. Buildout of the proposed project would accommodate 1,200 hospital beds (about 135 more beds than are provided at the existing hospital), plus 140 assisted living beds. The new hospital buildings would range from 4 to 7 stories tall, with heights up to about 86.5 feet. A total of 655 off-street parking spaces would be provided, an increase of 52 spaces above existing capacity. Off-street loading facilities would be consolidated into 11 loading spaces, about half the existing supply.	EIR	01/16/2002
2001032045	Effluent Discharge Limit Increase Project Central Contra Costa Sanitation District Martinez--Contra Costa The project is a proposed district policy change to increase the effluent discharge limit of the district's wastewater treatment plant from 45 million gallons per day (MGD) of average dry-weather flow (ADWF) to up to 53.8 MGD ADWF. 	gymnasium will be remodeled and preserved.		
2001111178	Sand City General Plan Update 2002 Sand City Sand City--Monterey The proposed 2002 General Plan is an update to the Sand City 1984 General Plan, and has a time frame of approximately 15 years. Its proposed land use policies acknowledge significant events and trends that have occurred since the General Plan was last updated. The General Plan advances land use policies of "traditional neighborhood development" (mixed commercial/residential land use, grid streets, pedestrian-friendly environments). The General Plan proposes a "build-out" population of approximately 1300 residents, up from its current population of 261. In order to facilitate this planned growth, the Plan also calls for a small water desalination facility to be constructed, similar in size and technology to the successful plant currently being operated in Marina, California.	Neg	12/31/2001
2001111179	State Route 99/145 and State Route 99/Gateway Drive Interchange Improvements Madera, City of Madera--Madera The SR-99/SR-145 and SR-99/Gateway Drive interchanges are proposed for reconstruction. Improvements to the existing SR-99/SR-145 Interchange include widening of the overcrossing as well as improvements to approach roadways and on- and off-ramps. These modifications will provide additional through lanes across the bridge, as well as dedicated turn lanes for entrance to northbound SR-99. Improvements to the SR-99/Gateway Drive Interchange include widening the existing one-lane overcrossing to accommodate two lanes of traffic, creating new on- and off-ramps, and extending Gateway Drive to connect to Almond Avenue.	Neg	12/31/2001
2001111180	Consolidation of Merced and El Nido Irrigation Districts Merced Irrigation District Merced, Atwater, Livingston--Merced, Mariposa The proposed project is composed of four related actions: 1) consolidating Merced Irrigation District (Merced ID) with El Nido Irrigation District (El Nido ID), 2) proceeding with the petition to the State Water Resources Control Board for an additional place of use to licenses Merced ID holds to divert water directly from the Merced River and from its storage at Lake McClure to complete the district consolidation (and related actions), 3) implementing a Memorandum of Understanding (MOU) between Merced ID and the California Department of Fish and Game (CDFG) regarding October instream flows, other interim instream flows, and fishery studies in the lower Merced River in order to remove the CDFG protest to the petition, and 4) as provided in the MOU exhibits, implementing the Merced River Adaptive Management Plan (MRAMP) that is the flow regime that would be implemented should the SJRA/VAMP project be terminated pursuant to provision(s) of the SJRA.	Neg	12/31/2001
2001112110	Prairie Oaks Elementary School Folsom Cordova Unified School District Folsom--Sacramento Site acquisition and construction of an elementary school within the Prairie Oaks residential subdivision.	Neg	01/04/2002

2001112112	East Jack London Sanitary Sewer Trunkline Replacement, City Project No. 98-90 Livermore, City of Livermore--Alameda The purpose of this project is to realign portions of the East and North Sanitary Trunkline Sewers out of private property and into the public right of way where they can be readily accessed and maintained. In addition, the trunkline sewers are over 40 years old and are in need of rehabilitation or replacement. The East Trunkline will be realigned on East Jack London Boulevard between Murrietta Boulevard and Kitty Hawk Road. The North Trunkline will be relocated along the Stealth Street recreation trail. The existing East Trunkline between Murrietta Boulevard and Stealth Street and Boeing Court and Kitty Hawk will be sliplined with a 12-inch pipeline to provide local collection. Portions of the East and North Trunklines will be filled with grout and abandoned.	Neg	01/03/2002
2001112113	Empire Ranch Elementary School Folsom Cordova Unified School District Folsom--Sacramento School site acquisition and construction of an elementary school within the Empire Ranch residential subdivision.	Neg	01/04/2002
2001112114	U.P. #01-36, Pioneer Exploration (State Venture, Inc. Owners) Tehama County --Tehama To establish a natural gas well in an EA-B:871; Exclusive Agricultural-Special Building Site 871,000 sf; (20 acre minimum) Combing Zoning District.	Neg	12/31/2001
1988022316	Brookside Estates Levee Lots Purd & Boat Docks Pro. Stockton, City of Stockton--San Joaquin Use Permit to construct and operate a 128-room, three-story hotel with accessory meeting rooms and accessory dining with the on-sale of general alcoholic beverages for hotel guests only, for property generally located west of Brookside Drive and south of Shadowbrook Drive (UP52-01).	NOD	
1989042401	Draft Supplement to the Public Facilities Element EIR Lincoln, City of Lincoln--Placer Involves the widening of State Highway 65 between Industrial Avenue and Westlake Boulevard/Ferrari Ranch Road with transitions at the south and north limits to conform to the existing roadway. Improvements to SR 65 would begin approximately 1,150 feet south of Industrial Avenue and extend north approximately 984 feet south of the two lane Auburn Ravine Bridge. The project would widen SR 65 from a two lane highway to a four lane highway plus a paved and striped median width of 11.8 feet.	NOD	
1993081125	Mission Valley East Corridor Transit Improvement Project San Diego, City of San Diego--SAN DIEGO CDFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1601 of the Fish and Game Code to the project applicant, the Metropolitan Transit Development Board (MTDB). The applicant proposes to improve the transportation system in the Mission Valley portion of the MTDB area	NOD

2000072099	American River Non Motorized Boat Improvements Sacramento County --Sacramento Three cast-in-place concrete boat launch ramps are to be constructed along the American River at Sailor Bar, Watt Avenue and Howe Avenue. The ramps will be constructed of steel reinforced concrete, with erosion-resistant cutoff walls and a grooved surface to improve vehicle and pedestrian traction. The area under and surrounding the new ramps will be graded to the proper angle (between 12 and 15 degrees), and at least six inches of compacted aggregate base will be installed as a base course. The concrete ramps will be 16 feet wide by approximately 60 feet long, and 6 inches thick. At all the ramp sites, a sixteen inch wide by 25 foot long section of the concrete ramp will be prefabricated at the site, then pushed part way into the river with a bulldozer to ensure that the ramp is usable at low flow conditions. The remainder of the ramp will then be poured in place. The pushed section of the ramp will be tied to the poured-in-place section with extra lengths of rebar sticking out of the pushed section.	NOD	
2000082014	Happy Camp Water Intake System and Storage Tank Improvements Happy Camp Community Services District Happy Camp--Siskiyou The project involves improvements to the collection, treatment, and distribution facilities such that the water system continually meets the State's Surface Water Treatment Regulations as well as improves the water intake facilities such that they are less prone to clogging from sediment during high flows and simpler to maintain. In addition, the project will provide additional storage volume and an alternate water source to increase the reliability of the water system.	NOD	
2001051020	Fort Ord Redevelopment Plan and GPA for Fort Ord Redevelopment Project Monterey County Marina, Seaside--Monterey The County of Monterey and the Monterey County Redevelopment Agency (RDA) are proposing to create the Fort Ord Redevelopment Area consisting of approximately 20,350 acres located on the east side of State Highway 1. The proposed Redevelopment Plan will provide the RDA with the ability to undertake various redevelopment activities and financing mechanisms to achieve the desired reuse of the base.	NOD	
2001061068	Cortez Hill Transitional Housing Facility San Diego, City of San Diego--San Diego Centre City Community Plan Amendment, Centre City Planned District Ordinance (PDO) Amendment, Conditional Use Permit (CUP), and Request for Release of Community Development Block Grant (CDBG) Funds in the amount of \$2,700,000 from Fiscal Year 2002, the Twenty-eighth Entitlement Program Year for the acquisition of a 17,790 square foot site occupied by the existing Day's Inn Hotel. The purpose of this acquisition would be to renovate the Day's Inn Hotel and to construct an adjacent 3,000 square foot building to accommodate 47 transitional housing units and associated services. The proposed activity would include nine parking spaces on-site. Amendments to the Community Plan and PDO would allow this use to occur on the proposed site with the approval of a CUP (Lot 1 of Clark Heights, Map 5884). Applicant: City of San Diego	NOD

2001071045	CSA 70 Zone L Reservoir 1B Project San Bernardino County Office of Special Districts --San Bernardino Construct a 1-MG Water Tank, includes site fencing and electrical service and piping to the adjacent water tank and Booster Station.	NOD	
2001081131	Schick S2001-06 Big Bear Municipal Water District Big Bear Lake--San Bernardino CDFG is executing a Lake and Streambed Alteration Agreement #6-2001-229 pursuant to Section 1603 of the Fish and Game Code to the project applicant, Greg Schick. The applicant proposes to dredge a channel in the lake adjacent to the Lakeview Court property, which will include the removal of 1400 cubic yards of material from the dredged area measuring 150 feet in length by 50 feet in width and to a depth of 15 feet below the full lake level at the toe. The project is intended to extend a previous dredge project for the provision of boat access and the reduction of aquatic weed growth.	NOD	
2001091062	Construction of Amerige Heights School Fullerton School District Fullerton--Orange Construction of a new school on approximately 10 acres providing classrooms and educational support facilities.	NOD	
2001101123	Alicia Parkway Widening Mission Viejo, City of Mission Viejo--Orange The proposed roadway widening consists of improvements to Alicia Parkway from Charlinda Drive to Muirlands Boulevard. Alicia Parkway, east of I-5, is built as a six-lane divided Major Arterial Highway in the City of Mission Viejo. The project involves widening the street from the present width of six-lanes to seven-lanes on the westbound side of Alicia Parkway. The additional seventh lane will be constructed in the westbound direction from Muirlands Boulevard to Charlinda Drive. The additional lane will operate as a combination through-right turn lane beginning at the intersection of Alicia Parkway at Muirlands Boulevard, continue westbound through the Alicia Parkway at Charlinda Drive intersection, and transition into the existing, exclusive right-turn lane onto the northbound I-5 freeway ramp. The roadway widening is proposed to occur within existing City public right-of-way that is currently improved with landscaping and a meandering sidewalk. The project also includes curb, gutter, sidewalk removal and construction, traffic signal and striping modifications, street lights, catch basin relocations, and relocation of directional signs. The project is intended to improve the operation and traffic flow within the project area, improve freeway accessibility to the I-5, and implement the planned roadway improvements per the Major Arterial designation standards. a low toxicity. The Site will be backfilled with clean soil and then paved with asphalt. The entire removal action will take about 25 to 30 working days to be completed. The on-site construction time should only take 10-15 days.

2001118426	Removal Action Work Plan for Nipomo Waste Oil Dump Site Toxic Substances Control, Department of --San Luis Obispo The proposed project is approval of a Removal Action Work Plan (RAW) for the excavation and offsite disposal of surface and subsurface soil contamination . The soil is contaminated with waste oil (A.K.A. total petroleum hydrocarbons). The removal action consists of excavating approximately 5,000 cubic yards of contaminated soil and transporting it as a designated waste to an appropriate permitted offsite disposal facility. The excavation will include the removal of surface deposits of waste oil and the removal and stockpiling of approximately three feet of clean overburden prior to the removal of a subsurface waste oil layer approximately nine inches thick. The excavation will be done on portions of seven one-acre properties located on Monarch Lane, Peacock Way and Pearlie Lane in Nipomo, California. These streets are cul-de-sacs (Monarch Lane and Pearlie Lane) or an entrance street to a cul-de-sac (Peacock Way). There is no through traffic on these streets.	NOE
